Overview

Document Purpose and Scope

These Release Notes are intended to communicate the new features in this build of *Coveo Enterprise Search* (CES); CES 5.2, build 3475. They document the new connector available, and are cumulative back to the most recent major release CES 5.2.

Background

Coveo has radically simplified the deployment of search-powered information access solutions. It is now possible to unleash the value inside all of your pan-enterprise information NOW! Best of all, our solutions are compatible so you can truly enable unified information access across multiple data silos. This release represents the most current availability iteration; CES 5.2, build 3475.

References

For information concerning the latest versions, updates, FAQ as well as additional documentation, refer to the Support section of our Web site (www.coveo.com). The following documents help better understand how CES and its components work:

- [Confluence Connector](#)

Licensing

For customers of CES 4 SP3 or later, no license changes are required. Customers that have CES 4 SP2 or less must contact *Coveo Sales* by phone at **1-800-635-5476** (US/Canada toll free), **00-800-2673-7642** (international toll free) or email <http://www.coveo.com/go?dest=Contact>.

Confluence Connector

Important: The Confluence Connector is only offered in limited availability and is not intended for production. To use the connector, contact *Coveo Sales*.

The *Confluence* connector allows users to crawl and index the content of a *Confluence Wiki* Web site or space. By using an administrative account, the content of the Web site or space can be indexed, including *Confluence* wiki pages, news items, comments and attachments.

It is available in the **Source Type** dropdown list displayed in the **Add Source** page of the Administration Tool (Index > Sources and Collections > Sources > Add).

Collection: Add Source Help

Defines the parameters of the source of documents.

Name ?

Source Type Confluence ▼

Addresses ?

Depends on the additional connector used.
One entry per line.

▶ **Known Limitations**

Live indexing and securities are not supported in the limited availability.
